

How does gravity affect objects?

What You Need

cup

index card

small assorted classroom objects

1

Examine

Share your description with your group.

2

Demonstrate

Follow the steps of Parts A and B to demonstrate how gravity acts on objects without touching them.

3

Describe

In the table, describe changes to the position and motion of objects in both parts of the investigation.

4

Draw Conclusions

Discuss each question and draw conclusions about how gravity affects objects.

Discuss each question and draw conclusions about how gravity affects objects.

 Wear safety goggles.
