

M DYSLEXIA SCREENER

Based on Nationally Recognized TPRI Assessment

Introducing the new Momentum Dyslexia Screener, offered as part of the Savvas Momentum Assessment Suite. The Dyslexia Screener is a powerful tool designed to help identify students who may be at risk for dyslexia. It empowers educators with valuable data, enabling them to recommend further screening and provide targeted instructional support in reading.

Available for back-to-school 2024, the Dyslexia Screener is:

- Administered at Grades K-3 and is a quick screener that takes no more than five minutes.
- Research-based and Tested with content directly from the Texas Primary Reading Inventory (TPRI), a widely used and nationally recognized reading assessment tool for understanding and evaluating the reading skills of young students.

Student Experience:

When students engage with the Dyslexia Screener, the process is designed to be user-friendly and supportive.

Students:

- Log in to the Savvas Realize® platform and access the screener with grade-specific instructions to ensure they know exactly what to do.
- Encounter Max, an engaging and helpful avatar who guides them through the process offering prompts to follow directions, and assisting them throughout.
- Have the opportunity to familiarize themselves with the format through example and practice items before the actual assessment begins.

Teacher Experience:

When teachers engage with the Dyslexia Screener, they play a crucial role in ensuring its effectiveness.

Teachers:

- Log in to the Savvas Realize platform and can easily assign the screener to their students.
- Monitor students as they take the screener, ensuring a smooth and reliable experience throughout the assessment process.
- Access an informative report with evaluations of students and their scores that identify students who are at risk. This report empowers educators with critical insights, enabling them to provide targeted support and interventions to students who may require extra assistance in their reading journey.
