

Evidence Explained

ESSA emphasizes “evidence-based” approaches that have demonstrated statistically significant positive effects on student outcomes. ESSA identifies four levels of evidence: Level 1 Strong, Level 2 Moderate, Level 3 Promising, and Level 4 Evidence that demonstrates a rationale. The levels are defined by the research study design.

enVision Mathematics 6–8 meets ESSA’s Level 2 evidence criteria

Moderate evidence criteria	Alignment to requirements	Detail
Quasi-experimental Study	Meets	A quasi-experimental study design where California schools using <i>enVision Mathematics 6–8</i> during the 2024–2025 school year were matched to similar schools using other elementary math programs.
Show a statistically significant and positive effect on student outcomes	Meets	<p>Schools using <i>enVision Mathematics 6–8</i> demonstrated a significantly higher math proficiency rate than control schools using other elementary math programs.</p> <p>7.8 • The percentage of students proficient in math is 7.8 percentage points greater in the <i>enVision Mathematics 6–8</i> schools than in the control schools.</p>

Year: 2024–2025

Study description: The study examined if *enVision Mathematics 6–8* is associated with higher math performance on the mathematics section of the Smarter Balanced Summative Assessment system by comparing schools using *enVision Mathematics 6–8* to closely matched control schools using other middle school math programs. A total of 288 *enVision Mathematics 6–8* and 288 control school-by-grade-level observations in California were represented in the sample at sixth to eighth grade.

The final sample was diverse including:

Economically Disadvantaged
